# What Is The Animal Kingdom? (Science Of Living Things)

## Synopsis

Intended for ages 6-12, this book explains the scientific classification of animals. It classifies and describes various creatures, including insects, mammals, and fish. It also explains the basics of kingdoms and species that form an important foundation for the study of biology, and tells how readers can help prevent their destruction.

Grade Level: 2 - 5

## Customer Reviews

I loved how thoroughly yet simply this book covered Animal classification for children. It is even informative to adults who need a refresher course. I loved the use of beautiful pictures for visual learners as well. A+ for organization and clarity. My daughter who is 10 and son 8 loved it as well. We homeschool and I felt this book had more to offer than many textbooks on this subject in a fun and dynamic way. I would recommend it for any school age child.

This is a great book for teaching classification of animals to elementary aged students. It has all the phyla with good pictures and just enough information for this age group so they are not overwhelmed! I had lost my book so ordered another one. I can't teach classification without it!
