Age Range: 4 - 8 years

Grade Level: Preschool - 3

Customer Reviews

This is an excellent activity book for any child that loves astronomy and is interested in the solar system. My 3 year-old loves space and has been obsessed with this book for the past 2 weeks. It has tons of sticker and even some of the moons of the some of other planets. Where else are you going to find Phobos, Deimos, and Titan stickers? Thinking of buying another!

My soon to be six year old LOVES anything space. He really enjoyed the stickers and activities in this book. There are interesting space facts and he enjoys me going over the actives with him. If you have a child that loves national geographic books and loves space, this is perfect for them!

My kid is really into space. I thought this book would be a good distraction for a long (11+ hour) car ride. Boy, was I right! It was well worth the reasonable price. I'm probably going to buy a second. Each page is full of unique activities: mazes, stickers, trivia, puzzles. The sticker pages are perforated, making them easy to tear out. I went ahead and cut out each section and stuffed them between their designated pages before the trip.

I bought these books for my daughters. I just ordered 2 more and I now have 4 of them. These are so much fun. They have different sized stickers and they are sectioned so you know which pages they go with. I remove the sticker pages from the books and cut the sections apart. Then when my children want to do a set of pages, I hand them the corresponding sections. There are also extra sticker sections. I use these and any leftover stickers from the activity pages for craft time. The sizes of the stickers vary and my kids enjoy the different sizes.

My nearly 6 year old son was entertained for several hours with this book during a long car trip. Stickers, mazes, and lots of activities that he could do on his own, and he preferred the book over all the other games and activities I had packed. Definitely worth the price!

I absolutely love these books for my son. These are all he asks for for his birthday! They're super easy to work with yet also challenging and educational. The graphics and pictures are always superb. LOVE these!

Got for my 4 yr. old grandson who has a corrugated space capsule and he had asked his Grammy to get him some stickers to decorate inside and this book fit the bill for that request. He loved the book and went thru it coloring and doing activities. Knew I could count on Nat. Geo!!!

It was a big hit with my nephew and niece!! I will be buying more of these type books for sure. they are 4 and 7 so big age range and both still loved it.
