# Oh, The Things They Invented!: All About Great Inventors (Cat In The Hat's Learning Library)

## Synopsis

From the first printing press to the World Wide Webâ”the Cat looks at inventors and inventions that have changed our lives! Â” The Cat in the Hat goes back in time to meet with the masterminds of more than a dozen inventions that made a major impact on our lives todayâ”from famous figures like Thomas Edison, Alexander Graham Bell, and the Wright brothers to lesser-known ones like Garrett Morgan, Mary Anderson, and Tim Berners-Lee. Children will learn basic information about each invention, as well as fascinating facts like how Guttenbergâ”™s famous printing machine was made from an old wine press, how a steaming teakettle may have inspired the creation of the steam engine, and how table salt changed the history of photography. Ideal for supporting the Common Core State Standards, and a natural for fans of the hit PBS Kids show The Cat in the Hat Knows a Lot About That!, this is a great way to introduce beginning readers to science!

## Customer Reviews

I have purchased this book as a Christmas present for my son. It is in really good condition and I'm very happy with the purchase. I love to read with him all of the Dr. Seuss books that we have (90+), my favorite books of the Dr. Seuss collection are the learning library one. These are not only fun to

read, but they teach you a lot of good information in a fun way.

A different flow and format from the usual Cat in the Hat series of books. Its a fun read with the kids as it speaks in terms anyone can understand. Lots and lots of illustrations to go along with the story make even my infant enjoy listening to the story being read.

This is definitely a great tool in a home school arsenal, I hope schools have this in there classroom as well. I use it as a learning supplement with my 4 year old and to introduce him to the possibility of creating someone great from just an idea.

I buy a lot of books for my grand daughter. She loves Dr. Seuss and this one was no exception. She loved reading about inventions and was very interested through the whole book. Recommend for all children.

Awesome book for curious minds! This is a great book to introduce kids to lots of different inventers and inventions. Sparked a lot of curiosity in my already curious 6 year old. He's now planning the next big invention! My younger kids (3 and 4) enjoy this book, too. The illustrations are great and the writing is true to the Seuss rhyming fashion. A neat and different way to learn about all things from steam engines to the cotton gin!

This book, illustrated with Dr. Zeus characters and poetic as were the original Dr. Zeus books, has a vocabulary far above that of the original Dr. Zeus books. I think it is more at around grade 5 reading level, and covers many inventions that at that grade level could have been developed more extensively. That is to say that part of the appeal of the original Dr. Zeus books was their easy readability and helping the child learn phonetic sounds in rather nonsensical settings, such as "I am Sam I am, and I do not like green eggs and ham." This book has none of that feel. If you want a brief introduction to many inventions, this book is a good springboard to deeper study.

This is another in the series of the Cat in The Hat science books, and we were excited to get this as our 2.5YO really enjoyed the books in this series that we had to date. Unfortunately this one just did not grip his attention the way that the others have and it has taken us a long time to get through the the book. There is a lot of good information in the book and it is presented in the expected format, but it feels like there is too much information for our LO at this timeWe are going to try this book

again in a couple of months to see whether he likes this more than

Too simplistic even for a 5 year old. Could have been written in a way that was enjoyable and still more informative. We like watching & learning from the TV show occasionally, but this wasn't up to that standard. Donated to a charity that supports even younger children.
