Customer Reviews

I first ran into this book in the library and I liked it so well I ordered my own copy. It has fancy shiny paper, full color pictures, and simply explanations written in big fonts. Perfect for my 4th grader! He can understand most of what this book says. I use it to homeschool him and we go through 6 pages a day. We finished the whole book in 3 months. I learned quite a bit myself about different things. It is the simplest encyclopedia I've found. I highly recommend it both for homeschoolers and for parents who want to make sure their kids know everything. The book is so interesting that my son

often leaves through it himself. It covers every subject, from space to history to plants to industry. I am normally a DK fan, but this one is just as good. I love it!

For the kids that "thought" they knew it all before. Now they can look at and read this very user friendly book that is basic and easy to read.

excellent
