Customer Reviews

I am so pleased to introduce you to The World of Animals. When we received this book from New Leaf Publishing Group, literal squeals of delight could be heard. The circle? On the cover? It's one of those photos that changes when you move around the book. The tiger growls. As you open the book, you'll find that it is just the beginning of bringing animals to life right at your fingertips. With main categories of A World Full of AnimalsSimple AnimalsWorms, Snails, & Starfish,Insects and Other Anthropods,FishAmphibians & Reptiles,Birds, andMammalsyou may be sure that anytime you open these pages, you'll be in the learning and discovery mode.Beautiful full color glossy pages give enough detail for observations and specialized learning.One thing I have enjoyed about these Master Books - is the lack of "Millions of Years" and reference to evolution.For those of you looking to purchase science books for a charter or umbrella school - in the index, there is no reference or

section on "Creation" or "God" as well. I would say - that the text has a Creationist timeline, in another Master Book, I read "before the flood". I have not read this book in entirety to find any "Faith Based" references and quickly found the reference above that states, "Many Years Ago". Normally - DK or other books would throw out a figure like 30 million years. We really enjoy this book - and it has been on our coffee table for a few weeks, and will continue to be a center piece to our indoor observation and additional learning about science and nature. I highly recommend it.
