Grade Level: Preschool - 1

Customer Reviews

I purchase these special needs books to teach young children about special people. We have a young man without legs. The children know that he needs help. I am looking for more books like these. I will order more.

A great addition about differences for my daycare. These books have real pictures of real kids doing everyday things. My daycare enjoyed them and had a lot of questions. A very good book and with the other four books in the series a great resource for teachers.

My 7 year old has a classmate in a wheelchair this year. She has asked lots of questions regarding this so this book helped demonstrate some of the ways wheelchairs are used. Another great fact

was it was at her reading level.

While the book certainly supports information for children, it might have been more helpful with examples expanded. Our 4 year old compared wheel chairs to cars, wheels etc as there was no personal illustrations coaxed in the book. Perhaps this is a good starter about wheel chairs but we wld like to have read a more emotional, practical discussion of the people using them.

I love this book. It shows diversity and was helpful for my students in understanding people with differences. Really good pictures.

Another great addition to the classroom library with vivid pics and simple text. Great for preschool / primary level.

Great book to share appreciation for differences in children!
